CS284 Data Cabinet

The CS284 Data Cabinet is currently the largest data cabinet of its class in Australia. It is designed as the workhorse for organisations requiring first class protection against severe heat, humidity and dust for data and media storage products like diskettes, tapes, CDs and microfiche.

The CS284 Data Cabinet is an independently tested product. It complies to test conditions imposed by both the Underwriters Laboratories Inc and the European Certification Board-Security Systems for fire resistance up to 2 hours. It also complies to test conditions subjecting the unit to a drop test as well. The CS284 will form a core component of any disaster recovery plan providing reliable protection for your organisation's data and mission-critical applications. For further information please contact Gunnebo Security or any of our Authorised Dealers.
