

# Secure Media

## for fire protection of data media

*Looking for a safe that will protect your data media from fire and humidity? Look no further. The Secure Media safe will provide first class fire protection for all your data media.*

Did you know that data media is destroyed when the temperature is just over 50°C or when the humidity is above 85 %? A cup of boiling tea or coffee or even the sun can seriously damage your CD's, DVD's, disks, backup tapes, microfilms, etc. Data media needs a far better protection than information stored on paper and the Secure Media safe offers the best protection for your data media.

### Model

Secure Media is presented in one model, which will give you an optimal protection and storage for your vulnerable data media. The cabinet is standard equipped with two extensible shelves offering a storage capacity of more than 500 CD/DVD's (5 mm cases).

### Locking

Standard the cabinet is equipped with a security key lock and supplied with two keys.

### Additional features

A slam action bolt work is used for easy and convenient closing and ensures full fire protection. This means you will not have to lock the door with a key in to be protected to a fire; just slam it! The unit is also prepared for base fixing as standard for increased security.

### Certification

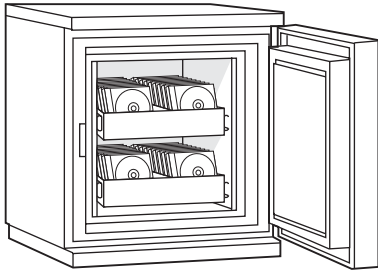

The Secure Media is certified for 1 Hour to one of the most demanding fire tests in the world; the UL72 Class 125. It also has a combined Fire and Impact test.

### Design

The cabinet will complement any office environment in terms of colour and design. It has a sophisticated modern look and is supplied in a light grey finish.
