Mini Banker Series

The Mini Banker is a secure and technically robust unit, fulfilling its main role of resisting forced attack, while offering the flexibility of a wide range of options. The Mini Banker's body consists of inner and outer bodies enclosing a seamless casting of Chubb Safes' patented M60 barrier material. This forms a monolithic structure that is both stable and consistent in strength.

In its standard format, the Mini Banker serves as a secure facility suitable for storing limited amounts of cash and valuables. In its optional formats, the Mini Banker is used across a broad range of applications; as the preferred safe in retail outlets, accommodating deposits, functioning in tandem with cash-in-transit operations and internal cash management practices. The Mini Banker also offers the flexibility of 3 locking configurations. For further information please contact Gunnebo Security or any of our Authorised Dealers.

Technical Data - Standard Configuration

External Dimensions (mm)	Size 1	Size 2	Size 3	Size 4	Size 5	Size 6	Size 7
A Height	410	488	590	590	717	894	1047
